REGION

The town area of the Milton Model Train Museum's layout is modeled after Milton in the 1950s. This is a view of Broadway Street, above.

Come see the trains at Milton Museum

The layout is constantly growing and changing. Details are added and improved down to trash cans added to homes and shades of paint added to show weathering on buildings, in photo at far right.

Linwood Hill, in photo at right, uses the controller to operate the Big Boy as it moves along the track during Monday evening's work night at the display. The three-year-old layout has five independent tracks.

The Milton Model Train Museum has a 20-foot by 60-foot O-Gauge layout, above, on the third floor of the Milton Moose Family Center at 139 S. Front St. in Milton. The annual Christmas open house is Saturday and Sunday and Dec. 18, 19 and 26 from 1 to 5 p.m. Admission is free. Barry Mabus, in photo at left, works along the layout's Front Street, which has two-way traffic.

PHOTOS BY JIMMY MAY

The worker on the model home, at right in the photo at far right, is just one of several interactive scenes that is activated with the touch of a button by visitors.

A farm scene, in the photo at right, is also part of the model train layout.

Ray Rough, in photo at left, places an engine on one of the lines during Monday evening's work night at the Milton Model Train Museum layout. There are two work nights a week as volunteers keep adding to the display. Eight different steam engines, above, sit at the working roundhouse.
